| Medical PPO | Employee + Spouse | 7/1/2014 | | Covered Dependents Spouse Test - Spouse |

As the AllPay's Benefit Management Suite is within a single database, any changes to benefits (medical, 401K, dental, etc.) are automatically updated to the associated payroll deduction and/or earning codes. **No missed updates or manual keying!**

Highlights include:

- Unlimited plans and tiers
- Automatic eligibility determination
- **Online Open Enrollment**
- Manage benefit enrollment, approval and apply discounts
- **Automated eligibility tracking including ACA status**
- Employee initiated life event submissions
- **Benefit changes flow automatically to payroll**
- Easily create the reports you need
- Produce employee benefit statements
- Notifies employee in MyPay of eligibility and enrollment options
- **Carrier connect**

Once an employee's status changes, they will receive a notification message when they log in to MyPay:

- The employee will see enrollment package and you, as the employer can make any pages "required reading" for the employee before they may submit their enrollment
- Employees electronically submit their signature after completion

You are able to approve submissions within AllPay--automatically rolling over to payroll!
